Q2 Network Review

Prepared for the operations board, July

Summary

Volumes through the eastern corridor grew for the third quarter running, while on-time performance slipped at two depots after the April timetable change. The network ended the quarter with more capacity than it used, which leaves room to consolidate the Thursday trunk runs.

Where we stand

- Consignments up 6.2% on Q1, led by Felixstowe and Immingham.
- On-time delivery at 93.1%, down from 95.4%.
- Fuel cost per trunk mile flat after the April hedge rolled over.

Depot performance

The table below compares the four depots on the measures the board tracks each quarter. Immingham's dip is almost entirely the two weeks of berth closures in May.

Depot	Consignments	On-time %	Cost per drop
Felixstowe	48,210	94.6	£11.20
Immingham	31,905	89.8	£12.75
Tilbury	27,440	93.9	£11.95
Grangemouth	12,118	95.2	£14.10
Total	**119,673**	**93.1**	**£12.14**

Recommendations

Merge the Thursday Immingham and Tilbury trunks from September, and keep the spare tractor unit at Felixstowe through peak. We should revisit the timetable change at Immingham before the winter schedule goes out.
