Winter Readiness Plan

Prepared for the safety committee, November

Why this matters

Winter disruption costs more when it catches depots unprepared. This plan sets out what each site should have ready by the end of November, and who checks it.

What each depot needs

- A gritting contract confirmed in writing.
- Cold-start checks added to the daily vehicle inspection.
- A named duty manager for each weather warning level.

Who checks what

Check	Owner	Due
Gritting contracts	Site managers	14 November
Vehicle checks	Fleet lead	21 November
Duty rota	Operations	28 November
