Q3 Network Review

Prepared for the operations board, October

Summary

The Hull depot opened on 4 August and handled 9,120 consignments in its first eight weeks, with on-time delivery at 96.2% [S1]. **The eastern corridor now carries most of the network's growth.**

Where we stand

- Consignments up 6.2% on Q1, led by Felixstowe and Immingham.
- On-time delivery at 93.1%, down from 95.4%.
- Fuel cost per trunk mile flat after the April hedge rolled over.

Depot performance

The table below compares the four depots on the measures the board tracks each quarter. Immingham's dip is almost entirely the two weeks of berth closures in May.

Depot	Consignments	On-time %	Cost per drop
Felixstowe	48,210	94.6	£11.20
Immingham	31,905	89.8	£12.75
Tilbury	27,440	93.9	£11.95
Grangemouth	12,118	95.2	£14.10
Hull	9,120	96.2	£13.40
Total	**128,793**	**93.4**	**£12.17**

Recommendations

Merge the Thursday Immingham and Tilbury trunks from September, and keep the spare tractor unit at Felixstowe through peak. We should revisit the timetable change at Immingham before the winter schedule goes out.
